Chairman's Message

The world is changing and it is changing very fast. Billionaire and Alibaba founder Jack Ma once said that the Third World War would be triggered if people lose their faith in politicians and religious leaders. The British conquered the world with guns and force during the 19th century. Today Jeff Bezos conquered the world with Amazon. We trust Amazon and its return policy more than our neighbourhood shops. The coming centuries are of creative entrepreneurs who will change the world we perceive through their creativity. A peer group is needed for all creative mindsets, which will support their ideas by providing resources for execution. The conclave will witness the gathering of such 300 creative minds who will share their ideas and resources on the platform. It is the beginning of a life-long journey of relationships. Let us join hands to make this world a better place for people with happiness and health
